September 27, 2021

# Taking on the challenge of entering a high-growth market of JPY10 trillion through Marketing DX Solutions

Becoming a Marketing DX Partner by understanding consumers' WHY with Data Insights as the core focus This report analyzes corporate value based on the GCC Management <sup>™</sup> perspective, which emphasizes three elements: Growth (sales growth), Connection (strategic connection of all stakeholders, leading to improved stability), and Confidence (enhanced trust and lowered business risks).

Aiming for a market value of JPY30 billion through Marketing DX Solutions

Founded in 2003 as an Internet research company, Cross Marketing Group Inc. (hereinafter referred to as "the Company") has expanded its business scope to include marketing research and solutions. It has achieved high growth by developing comprehensive marketing and IT solutions with the help of mergers and acquisitions (M&A), centered on a deep understanding of consumers (insights, detailed below).

Moving forward, against the backdrop of progress of digital transformation in marketing, the Company will strengthen DX support by understanding consumers based on research and focusing on decoding the Why, to transform into a "Marketing DX Solutions" company.

With these changes, the Company aims to achieve sales of JPY 30 billion with an operating profit of JPY3 billion and a total market value of JPY 30 billion in the fiscal year ending June 2024.

Market capitalization 30 billion yen, sales 30 billion yen, operating income 3 billion yen

Comparison with the total of 12 months up to the fiscal year ending June 2021 (annual growth rate) Sales growth of 16.3%, operating income growth of 17.9%

Achieving the target of JPY30 billion in June 2024 is highly possible.

Based on the analysis of the data disclosed by the Company, Jay Phoenix Research (hereinafter referred to as "JPR") concluded that the target of reaching JPY30 billion in market value by June 2024 is achievable. If DX-related growth increases, the analysis indicated that there is a good chance of reaching a market capitalization of JPY 50 billion within a few years, reflecting a growth outlook of approximately 10 years. Compared to the current market capitalization, the upside is 1.9 times with a market capitalization of JPY 30 billion and 3.2 times with a market capitalization of JPY 50 billion.

# 1. Outline of Shareholder Value Outlook for the medium term

2/39

## Formulation of a new mission and vision in the fiscal year ending December 2019

## Becoming a corporate Group that "creates the future"

Mission and Vision: "Discover Something New." and "Just go for it!"

As the Company approached the fiscal year-end of December 2019, it formulated a new mission and vision with a determination to continue taking on new challenges to pioneer the future and realize the dreams of its customers.

The Company's mission is: "Discover Something New" From identifying issues, planning solutions, and presenting implementation proposals, it promises to create the future envisioned by its customers and help them realize it.

In addition, the Company's vision, ""Just go for it! "" reflects the stance of actively promoting the good of its customers and teams. This vision is appreciated as it expresses the attitude of providing a one-stop, comprehensive solution to its customers.

Under this mission and vision, the Company's management is considered trustworthy by all stakeholders and it continues to achieve sustainable growth, aiming to become a corporate Group that "creates the future" through businesses and services that contribute to the society at large.

# Global expansion over 20 sites in 11 countries

### **Future Strategies**

DX Growth in the Marketing field

Further accelerated by the Covid-19 pandemic

## Promote Marketing DX Solutions

#### Future Strategies: Growth through Marketing DX Solutions

#### 2021 onward: Focus on "Marketing DX", a high-growth field of the future

The Company is expected to grow further by responding to major changes in the external environment, such as digital shifts and DX, as well as changes in consumer needs and lifestyles, including responses to the spread of the Covid-19. According to Dentsu Digital Corporation, 50% of the surveyed companies reported that DX is accelerating due to the effects of the Covid-19. \*

In response to such changes, the Company, at the financial results briefing for the fiscal year ending in December 2020, announced that it would aim to be a group that uses digital/IT to create a future that will lead customers' businesses to success, and would thoroughly strengthen its digital marketing domain. In particular, to focus on the high-growth field "Marketing DX," the Company will promote "Marketing DX Solutions," which are marketing solutions enhanced by digital transformation (DX) support.

#### Targets and growth strategies for 2021 and beyond

#### Future target fields "Marketing DX", a high-growth field

To digitize marketing processes such as market research, product development, advertising, and effectiveness verification, cross various digital data, and create new businesses and organizations.

#### Value provided by the company Marketing DX Solution

Using the power of digital, centering on "clarification of consumer WHY (why)" by analyzing consumer data, providing necessary data, decision support to marketing measures for issues in promoting customer business Being able to carry out the process and lead to a solution

Customer feedback to Marketing DX Partners through accumulation

#### Grow as a "Marketing DX Partner" with customers

Through this strategy, the Company is expected to strengthen the added value of its solution capabilities by accumulating, analyzing, and utilizing data received from customers, and grow together with them as a "Marketing DX Partner."

#### Relationships with client companies

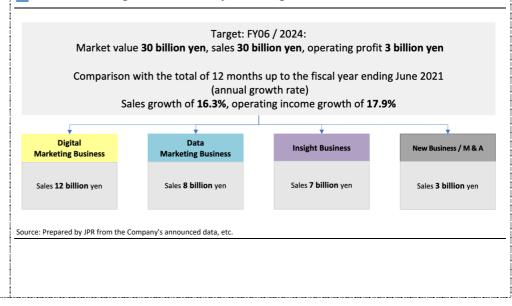

Source: Prepared by JPR based on the Company's interviews

#### Numerical targets for the fiscal year ending June 2024

Based on these strategies, the Company has set targets of reaching a market value of JPY 30 billion, net sales of JPY 30 billion, and an operating profit of JPY 3 billion in the fiscal year ending June 2024. The sales is expected to grow 16.3% annually. In addition, the profit will increase due to expansion in scale and other factors, resulting in an annual growth of 17.9%. This is an achievable target, considering the market environment and the effect of reducing the overhead ratio through cross-selling in one-stop solutions.

#### Numerical Targets for the fiscal year ending June 2024

Targets for fiscal year ending June 2024: Market capitalization of JPY 30 billion; Net sales of JPY 30 billion; Operating profit of JPY 3 billion

High return on invested capital compared to competitors

High level of knowhow in M&A **Current Situation and Outlook for Shareholder Value** 

#### Return on invested capital is higher than that of competitors in research and lower than that of competitors in digital marketing

The following is a summary of the Company's financial data. Financial data for companies listed in the marketing research field, Macromill, Inc. (first section of the Tokyo Stock Exchange, 3978, hereinafter "Macromill") and Members Co., Ltd. (first section of the Tokyo Stock Exchange, 2130, hereinafter "Members") whose future direction is very similar to that of the Company, is also summarized for comparison. Members is involved in digital strategy and the development of necessary systems for the implementation of such strategies in the digital marketing field, thus, channeling effort into the field that the Company will expand into in the immediate future. The Company's return on invested capital (ROIC) is 23.5%, based on its plan for this fiscal year, and based on invested capital for the fiscal year ending June 2021. This is 17.8 points higher than Macromill's 5.7% that was estimated using the same measures. In contrast, this is lower than Members' estimated return of 42.1%. The Company expects upside profitability by focusing its efforts in the digital marketing field and increasing businesses that are similar to those of Members.

It is important to note that even though the Company executes a large number of M&A, the ratio of invested capital to sales is low. This indicates that the Company has a high level of know-how in M&A.

Potential for higher profitability if digital marketing market expands Overview of the Company's financial data and that of leading publicly traded companies in market research and digital marketing

Analyze Shareholder Value with GCC<sup>™</sup> Framework

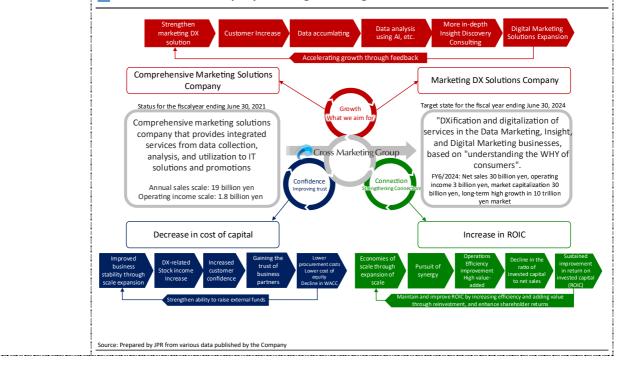

#### **Outlook for Shareholder Value Creation capabilities**

To examine future trends in shareholder value, JPR uses a framework called GCC<sup>™</sup> Management System (taking the first letter of the following three English words in parentheses) to visualize and quantify qualitative strategic information as shareholder value by linking sales growth (Growth), strategic connection (Connection), and trust (Confidence). The following chart outlines the Company's strategy from the GCC's perspective.

## Shareholder value is improved by each GCC growth loop

From the Growth point of view, higher growth can be expected. From the Connection point of view, a higher ROIC can be expected. And from the Confidence point of view, a decrease in capital costs can be expected.

## Quantification of GCC<sup>™</sup> content

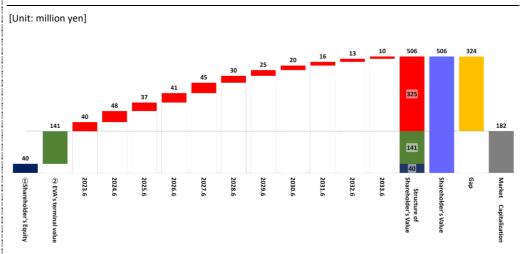

Possibility of achieving a market capitalization of JPY30 billion in the fiscal year ending June 2024

Potential for a market capitalization of JPY50 billion when growth from strengthening digital marketing is factored in

#### Estimated shareholder value from the perspective of GCC<sup>™</sup>

The value design and GCC<sup>™</sup> content were quantified, and the shareholder value of the Company was calculated using ""the excess profit method" (detailed below)." The excess profit method is a method of estimating shareholder value based on the assumed future of sales, invested capital, and cost of capital shown on the previous page. The results are consistent with the discounted cash flow method. We calculated the shareholder value until the fiscal year ending June 2032 based on what we have seen so far and the contents of GCC<sup>™</sup>. The Company is expected to achieve a value of JPY 30 billion in the fiscal year ending June 2025. Since stock prices reflect future expectations, if we reflect on the assumed shareholder value in the market capitalization of the year prior, the total market value of JPY 30 billion will be achievable at the end of the fiscal year ending June 2024. Furthermore, if the growth in about 10 years is factored in, the market capitalization could potentially reach JPY 50 billion. Members, which specializes in digital marketing, has factored in a 10-year growth in its market capitalization.

#### Assumptions and Results of Estimation of Shareholder Value Based on the Excess Profit Method

| Initiatives toward     | Group's husiness model and the expansion of its husiness domains hy integrating         |

**Marketing DX Partners** 

In the fiscal year ending June 2022, the Company will proceed with a variety of activities toward ""Marketing DX Partner,"" the guiding principle for the mid-term business plan. As the first step, the Company will promote the evolution of the Group's business model and the expansion of its business domains by integrating the Group's CRM data, sharing panel networks, and creating new services through DX and business models, based on the customer data and 8 million-person panel networks, data analytics technologies, and marketing research systems that the Group has accumulated until now.

Hence, the Company forecasts sales of JPY23.051 billion, operating profit of JPY1.903 billion, ordinary profit of JPY1.85 billion, and shareholder company net profit of JPY1.101 billion for the fiscal year ending June 2022.

## Data Marketing Business—efficiently gathering consumer data

#### Positioning the business—The starting point of the marketing process

The Data Marketing Business supports clients' decision-making in marketing activities by mainly collecting data online. It provides various marketing research services to support the clients' marketing process. The following six companies are the main subsidiaries.

#### Major Subsidiaries in the Data Marketing Business

| Company Nam        | e  | Business Overview  |
|--------------------|--|--|
| Cross Marketing    | Cross Marketing Inc.                                 | A company that provides services related to marketing research planning, marketing research design, and consulting.  |
| Kadence            | Kadence International<br>Business Research Pte. Ltd. | A corporate group that operates in the U.K., the U.S., and other Asian countries and conducts marketing research.<br>Holding company headquartered in Singapore. |
| MARKELYTICS        | Markelytics Solutions India<br>Pte. Ltd.             | Marketing research company with main clients in Europe and North<br>America.<br>Headquartered in Bangalore.  |
| Medical World Pane | Medical World Panel Asia<br>Pte.Ltd                  | Management and operation of specialized monitors for medical<br>workers and patients for each disease.   |

## Utilization of panels from other partnership companies

Source: Prepared by JPR from the company's website

#### Japan's largest panel

Panel survey is an important method in marketing research. The panel survey consists of repeatedly asking the same question to the same participant for a certain period of time. Through panel surveys using questionnaires and data analysis, it is possible to quantitatively grasp the long-term accumulated effects of change factors and measures that occur due to sales promotions and marketing activities. The participants of panel surveys are called panels. There are about 2.2 million in-house and 4.7 million panels in total (as of October 2020), including partner panels with other companies.

Japan's largest panel with diverse attributes—about 4.7 million panels

#### Large-scale survey panel and its utilization

Classification and management of over 20 special monitors The Company extracts registered monitors in advance that meet specific conditions concerning consumer goods and assets possessed, and categorizes and manages over 20 "special monitors," such as "automobile owner monitors" and "mobile phone owner monitors," according to these conditions. It preliminarily investigates the items that are

## Medical personnel panel in more than 19 countries in four continents

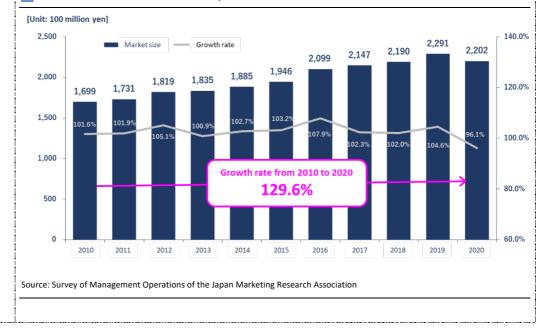

often required as a condition by clients for their survey target and then groups the target audiences. It is not necessary to set the target audience selection requirements for similar surveys each time, and it is possible to conduct a speedy survey. In addition, emails requesting participation in surveys can be distributed efficiently to specific groups, contributing to both improvements in quality and efficiency.

Medical World Panel, which is a part of this business, has panels of more than 540,000 medical professionals, who cover more than 19 countries on four continents. These panels cover specialized fields such as general physicians, HIV specialists, nervous medicine, dialysis, oncology, circulatory medicine, and urinary medicine.

#### Strategy going forward

Before the domestic research market decreased in size in 2020 due to the Covid-19, stable growth was the trend.

Moving forward, the company plans to leverage its expertise to sell research tools, particularly SaaS, to external customers. By providing clients with tools that enable them to realize diverse and broad research themselves, the Company aims to support them in strengthening their businesses. From the viewpoint of upgrading the existing business model, the Company expects to improve profitability by strengthening areas ranging from diagnosis to analysis and database operations. New development investments require standardization of cloud-based business intelligence and development of user profiling tools.

Trends in Market Size in the Japanese Domestic Research Market

## Insight Business—Analyzing and understanding consumer insights

## Positioning the business—A key to decision-making in marketing activities

The Insight Business is a key to decision-making in marketing activities and supports clients' marketing decisions by providing consultation for problem-solving and consumer insights discovery. It is mainly operated by the following five companies.

#### Main Subsidiaries of the Insight Business

| Company Name               |   | Business Overview  |
|----------------------------|---|--|
| Cross Marketing            | Cross Marketing Inc.                                    | A company that provides services related to marketing research planning, marketing research design, and consulting.  |
|                            | Kadence International<br>Business Research Pte.<br>Ltd. | A corporate group that operates in the U.K., the U.S., and other Asian countries and conducts marketing research.<br>Holding company headquartered in Singapore.   |

#### Offering Online Research and Offline Research as a Set

Offline research offered as part of a set The present business offers online and offline research as a set. The Company develops a survey program according to the survey plan and provides quantitative research services. These services range from online research—in which surveys are collected from research collaborators on the Internet, Central Location Test (CLT) research—in which survey collaborators are gathered at the venue to conduct questionnaires and interviews, to qualitative research services such as focus group interviews—in which survey collaborators are interviewed in a group discussion format. It has facilities available for interviews and surveys in Japan and overseas and has ample experience in project implementation.

location data utilization developed and provided by D&M—and the Company's research services, it is possible to analyze the areas where store users live and how they behave. This is made possible by utilizing the location data from "groups of residents in specific areas" and "groups of contacts at specific points." Location information big data can also be used for analyzing competing stores, and capturing the current status of the target store. This makes it possible to derive measures to resolve marketing issues, such as development of new customers, promotion of repeat sales by existing customers, and improvement of customer acquisition efficiency through advertising.

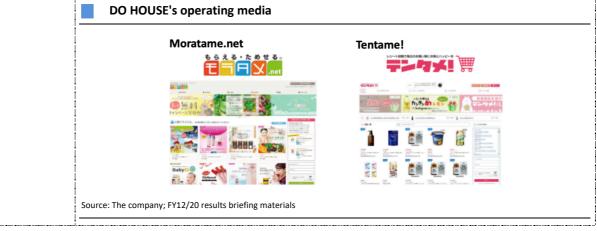

In addition, by linking these with major DMPs (Data Management Platform) such as Treasure Data and Adobe, it is possible to provide various outputs required for DMP A (Observe, Orient, Decide, Act) loops, which are crucial for marketing.

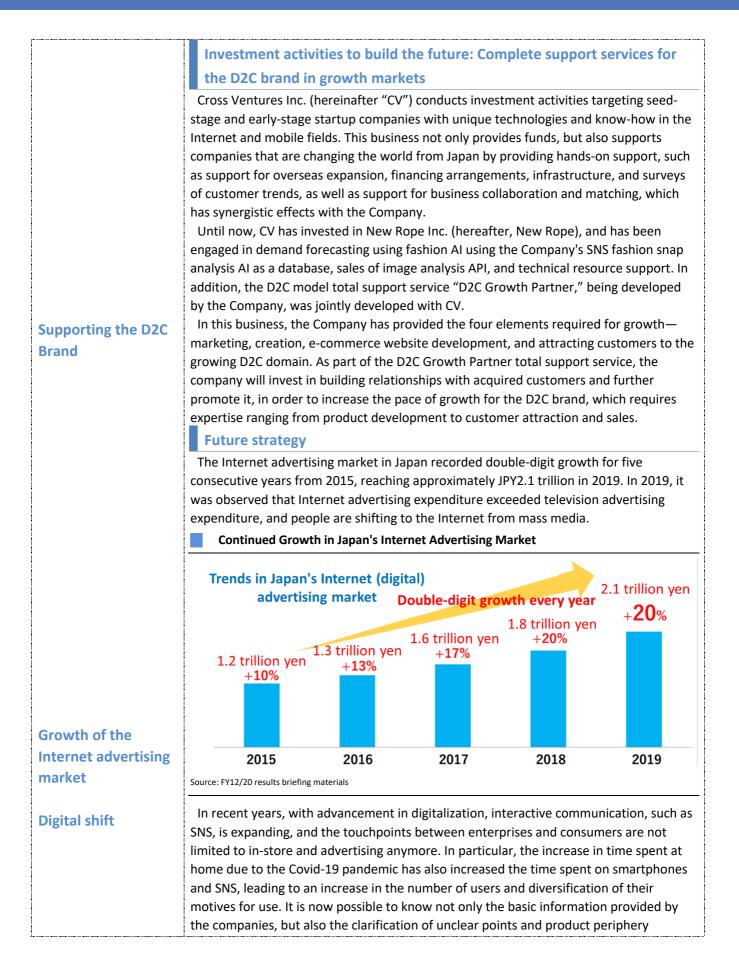

# Acquisition of web media business

#### Entry into the Web media business

With the Company's entry into the web media business through the acquisition of DO HOUSE in January 2021, the Group not only acquired registered panels specializing in survey responses (which has expanded since its foundation), but also realized membership acquisitions that can be reached for promotions. DO HOUSE has formed its own consumer network panel of 5.5 million people through word-of-mouth survey media, including "Moratame.net" and "Tentame!". Until now, the Company has expanded its panels and customer base, but by making DO HOUSE a subsidiary, it has been able to both expand consumer panels and connect with manufacturers. In addition, since DO HOUSE will aid the Company with the growth of its web media operations, this will accelerate the growth of the business.

information, which makes it easy to generate sympathy. This makes social media marketing using SNS (SMM) one of the key touchpoints.

In addition, according to a survey conducted by Ureru Net Advertising Co. Ltd., information contact points are shifting to SNS due to the spread of smartphones, which improves information literacy among consumers, and requires that the brand's vision and ideas to be disseminated to optimal targets. Against this backdrop, the digital D2C market continues to grow over the medium-to-long term, and further growth is expected in combination with the changes in purchasing behavior due to the Covid-19 pandemic.

#### The D2C market, which is expected to grow continuously

Source: Prepared by JPR based on a survey by "Selling Internet Advertising Company"

The domestic DX market is also expected to grow alongside the D2C market. Against the backdrop of the market environment described earlier, the Company plans to provide added value through the DX of services and operations and the DX of research data. In addition, it will also improve the efficiency by using the DX and AI services for inhouse operations, thereby reducing the client response time.

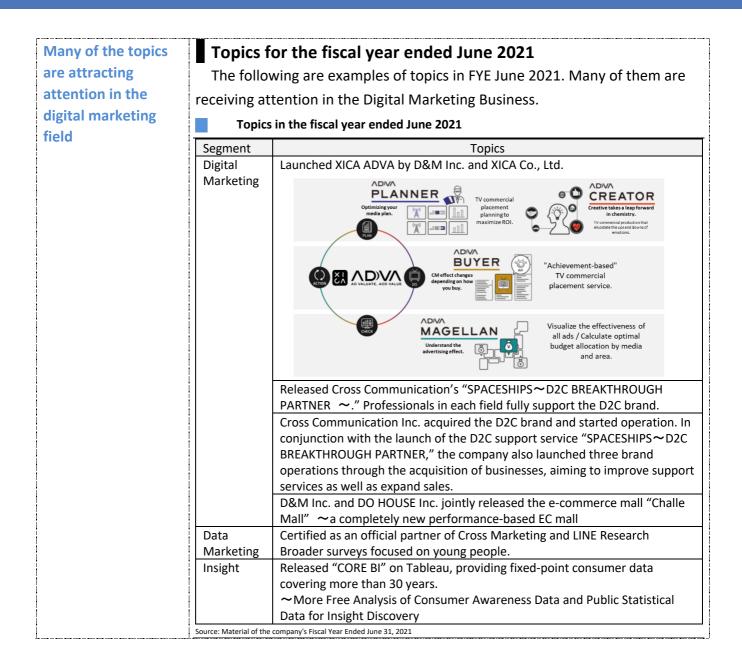

#### Challenges

**Utilization of SNS** 

In the D2C market:

**Growth prediction** 

The challenges that the business might confront include rapid changes in technology and industry standards. The users' needs are also expected to change accordingly. With no major barriers to entry and fierce competition, the business must adapt to this change promptly. This will strengthen its competitiveness and reduce costs. In addition, given the situation due to Covid-19, the existing sales methods do not work. Therefore, the Digital Marketing Business, a business that integrates IT solutions and other businesses, has been chosen by the Company to be at the core of its growth, to support its effort aimed at expanding its corporate value to be a comprehensive marketing solutions company.

# 4. ESG initiatives

# ESG Efforts

Contributing to wellbeing of people of all ages

Contributing to ensuring sustainable consumption and production patterns

The Audit and Supervisory Committee Members, Executive Directors, and Outside Directors of the Company

## Sustainable strategy with a social theme

#### **Contributions through research**

The Company provides research support to various operating companies through its Data Marketing and Insight Businesses, thereby facilitating those activities of operating companies that contribute directly or indirectly to SDGs. This enables the Company to contribute indirectly to SDGs. Moreover, the Company is a part of World Medical Panel and Medilead, both specialized in the medical field, which are expected to play a central role in contributing to "ensuring healthy lives and promoting wellbeing for all people of all ages."

#### Contribution through the Digital Marketing Business

In the Digital Marketing Business, the Company offers optimal marketing methods to customers by analyzing consumer behavior. By providing such adequate information to consumers, the Company promotes consumer education and contributes to "ensuring sustainable consumption and production patterns."

In addition, the Company's strengths in app development and operation in the financial industry can allow consumer access to financial services. By engaging in the development of these financial infrastructures, Japan is expected to contribute to "promoting inclusive and sustainable economic growth, employment and decent work for all."

## Corporate Governance

#### **Board of Directors**

The Company has seven directors. Miki Igarashi (Representative Director, President, and CEO), Koji Onozuka (Managing Director, CFO Group Management Strategy Department), Masahiro Sugimura, and Seiji Tominaga are the Executive Directors. The outside directors include Jun Narimatsu, Teruki Uchida, and Yasuaki Tahara, who are the Audit Committee Members.

Mr. Narimatsu possesses specialized knowledge as a certified public accountant and deep insight from his many years of business experience. He comes from an auditing firm background, and is currently the CEO and representative director of Museo Co., Ltd. He concurrently serves as an officer of five companies, including the Company. Mr. Uchida is a former officer in the Ministry of Finance and currently serves as an attorney, after serving as a director of an operating company. Mr. Tahara is from an operating company in manufacturing and finance and has extensive experience and broad insight with numerous years of operational experience in the accounting and financial field.

The president and CEO, and two of the three outside directors serving on the Audit and Supervisory Committee, concurrently serve as outside directors of other listed companies. However, this does not affect the execution of their duties as directors. Remaining directors do not concurrently serve as officers other than in the Company, and the Company has a system that ensures sufficient time for them to properly execute their expected roles and responsibilities.

|   | Director's stock compensation system  |
|---|---|
| Introduction of stock<br>compensation system<br>with transfer<br>restrictions | The Company has introduced a restricted stock compensation system (with performance conditions) for directors (excluding directors serving on the Audit and Supervisory Committee and outside directors) and executive officers of the Company with the intention of enhancing their motivation to achieve the Company's performance targets and continuously increase corporate value. As both short-term performance goals and medium-to-long-term performance goals are evaluated, this transfer-restricted stock compensation system (performance conditional) uses one or more of the four performance goals, such as sales and profit, in each business under the jurisdiction for a single year and three years as indicators at the expiration date of the transfer-restricted period. This is used as a reward system to remove the transfer restriction in the range of 0% to 100% according to the degree of achievement of the performance target indicators in the four period categories. Performance indicators related to share-based compensation are set based on sales and contribution margin (calculated by excluding fixed costs such as rent and utilities and allocated expenses from the Company as operating profit) among the single-year results and the three-year results within the scope of the respective directors' jurisdiction. |

# 5. Shareholder Return Policy

# Shareholder Return Policy

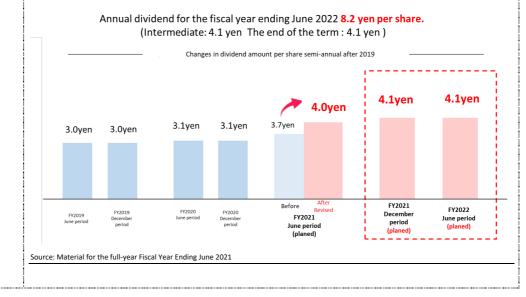

FYE June 2021: Plan to increase the year-end dividend from JPY0.3 to JPY4.0 per share

## Shareholder Return Policy

In June 2020, the company secured cash through long-term borrowings of JPY2billion. The Company's shareholder return policy determines the amount of the dividends based on a consolidated dividend payout ratio of 15%. Based on the forecast for the fiscal year ending June 2021, the Company plans to increase its distribution. Based on the most recent strong results, the Company plans to pay JPY 4.0 per share.

#### Trends in dividends

The year-end dividend for the fiscal year ending June 2021 will be increased by 0.3 yen to a dividend of 4.0 yen.

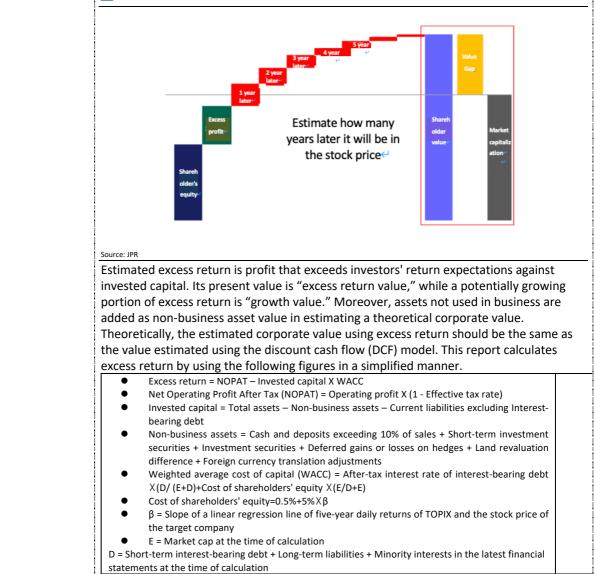

# Appendix

Corporate value estimated by use of ROIC and excess return

# I. Excess return analysis framework

Excess profit or economic value added is globally used as an indicator to estimate corporate value, evidenced by its adoption by Kao Corporation, a Grand Prix winner of the Tokyo Stock Exchange Fifth Corporate Value Improvement Award (FY2016). In the calculation of excess return, corporate value can be broken down into four elements: invested capital, excess return value, growth value, and non-business assets. This facilitates a better understanding of the structure that creates corporate value. A company might be overvalued or undervalued when its market cap is higher or is lower than its theoretical corporate value, respectively. The contribution of each year's corporate value can be visualized in the following figure, wherein shareholders' equity is simply represented as a sum of invested capital and non-business asset, subtracting interest-bearing debts. The figure below allows us to estimate how many years of growth might be incorporated into the stock price.

#### Breakdown of corporate value using excess return
